

DUAL BOTTLE CLOSURE

Abstract of the Disclosure

A dual bottle closure which includes a ceramic bottle with an imperforate crown cap secured to the opening of the bottle as well as a ceramic cap with a plastic insert which surrounds the crown cap is disclosed. The insert fits within the ceramic cap and has threads which screw onto the threads located on the neck of the bottle. In a second embodiment of the invention a cap with an insert substantially covers the opening of a bottle. The insert has threads which screw onto the threads located on the neck of the bottle. A cork is inserted into the opening of the bottle and is covered by the cap and insert.
